

Foliation and Birational Geometry

The goal of this conference is to discuss recent progress in foliation theory from the perspective of birational geometry and related topics. The conference also aims to attract more graduate students to work in the field of foliation theory.

Time and Venue:

Time: Aug. 26 - Aug. 30, 2024

Venue: Gu Lecture Hall, Shanghai Center for Mathematical Sciences, Fudan University, Jiangwan

Campus, Shanghai

Invited Speakers:

Fabio Bernasconi (Université de Neuchâtel) Xin Lu (East China Normal University)

Frédéric Campana (University of Lorraine) Wenhao Ou (Chinese Academy of Sciences)

Paolo Cascini (Imperial College London) Calum Spicer (King's College London)

Guodu Chen (Shanghai Jiao Tong University) Roberto Svaldi (University of Milan)

Yen-An Chen (Imperial College London) Shengli Tan (East China Normal University)

Giulio Codogni (Roma Tre University)

Luca Tasin (University of Milan)

Omprokash Das (Tata Institute) Frédéric Touzet (Université de Rennes)

Osamu Fujino (Kyoto University) Lingyao Xie (University of California San Diego)

Jie Liu (Chinese Academy of Sciences)

Lei Zhang (University of Science and Technology of China)

Organizers:

Meng Chen, Jingjun Han, Chen Jiang, Jihao Liu

Sponsers:

Shanghai Center for Mathematical Sciences

National Natural Science Foundation of China

National Key Research and Development Program of China

Contact: Jingjun Han (hanjingjun@fudan.edu.cn), Jihao Liu (jliu@northwestern.edu)

Address: No 2005 Songhu Road Shanghai China Email: scms@fudan.edu.cn www.scms.fudan.edu.cn
